## Secure GPS Tracking

# Hiddentec

**Hiddentec** are designers and manufacturers of **specialist GPS tracking equipment**. With nearly two decades of experience in the GPS tracking industry, **Hiddentec** are proud to be considered experts in the field.

With offices in the United Kingdom, United States, Europe and the Middle East, and with equipment in use in over fifty countries; **Hiddentec** have a truly global footprint.

**Hiddentec's** clients are primarily those in Intelligence services, military and special forces, counter terror, police forces and government agencies. Our corporate clients include high-end Blue Chip corporations and household names.

One of the keys to the company's success over the years has been the ability to provide extremely secure software platforms, and hardware with sophisticated power management features.

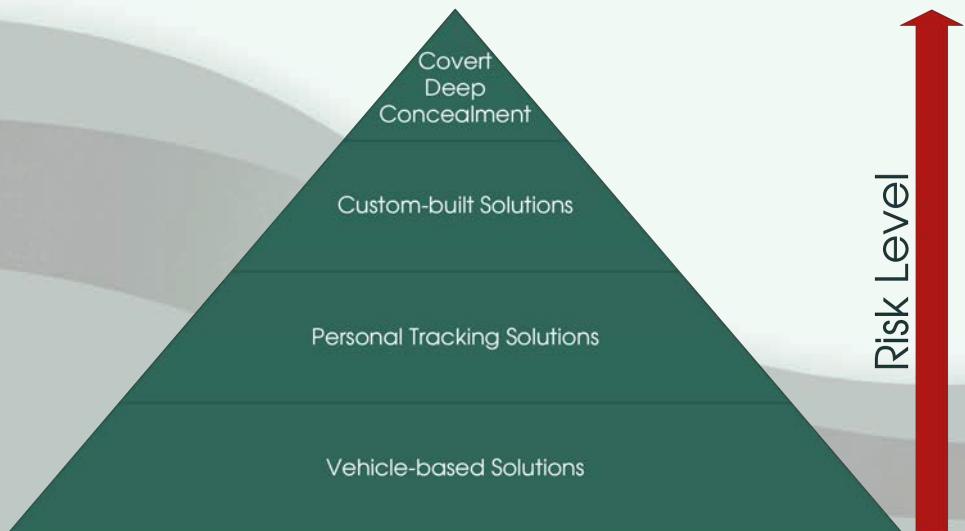

# Personal Tracking

**Hiddentec** design and manufacture **discreet tracking devices** designed to be worn or carried in a bag or pocket.

- **Protect yourself**, your family and loved ones by giving them a crucial lifeline
- Monitor the locations of VIPs and protection details for **improved situational awareness**
- Receive **immediate notification** of movements and emergency situations via email or SMS message

As the level of risk in an operation increases, so too must the level and complexity of tracking technology being deployed.

# High-value Asset Tracking

Every day, assets of tremendous monetary (and often personal) value are shipped from one location to another. In many cases, the consequences of such items failing to reach their destination would be disastrous.

**Hiddentec** specialise in the creation of GPS trackers to incorporate with your assets, their packaging and display furniture in order to let you know:

- **Where is it?** View the precise location of your asset in real time.
- **Where has it been?** View the detailed history of its journey including any unscheduled detours or stops.
- **Is it on schedule?** Gain real world intelligence on your assets' locations, without waiting for vague courier data, to accurately manage your business.
- **Can it be recovered when stolen?** Guide law enforcement and recovery personnel directly to your asset, anywhere in the world.

# Access Data From Anywhere

With a **Hiddentec** GPS tracking system, you will be able to live **track your vehicles, personnel and assets from anywhere in the world**, from any web-enabled device.

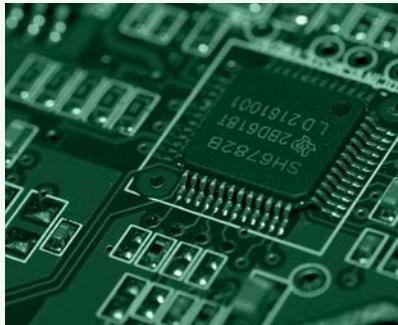

We offer the choice of using a selection of **desktop client software**, as well as **in-browser viewing** options.

A dedicated management client allows you to **securely administrate your trackers and users remotely**.

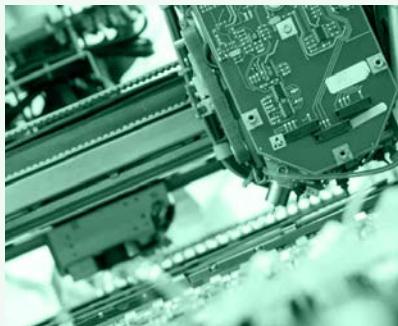

You can also track and monitor your devices using our **dedicated iOS and Android apps**.

# Custom Design

In addition to designing and manufacturing our own range of **advanced GPS tracking devices** for police, military and government use; Hiddentec provide the service of creating **custom-built devices** to suit the client's exact requirements.

- Do you require a unique, purpose-specific device?
- Does your device need to be covertly installed?
- Do you face operational challenges?

A consultation with **Hiddentec** may yield positive results.

Our team of experts will advise on the correct technologies to suit your operation, and can even assist in setup and installation for **added security and discretion**.
